

L-BOXX® & ProClick Product Range

Work on the go - Fast . Efficient . With system

MORE THAN JUST A BOXX
A mobility system

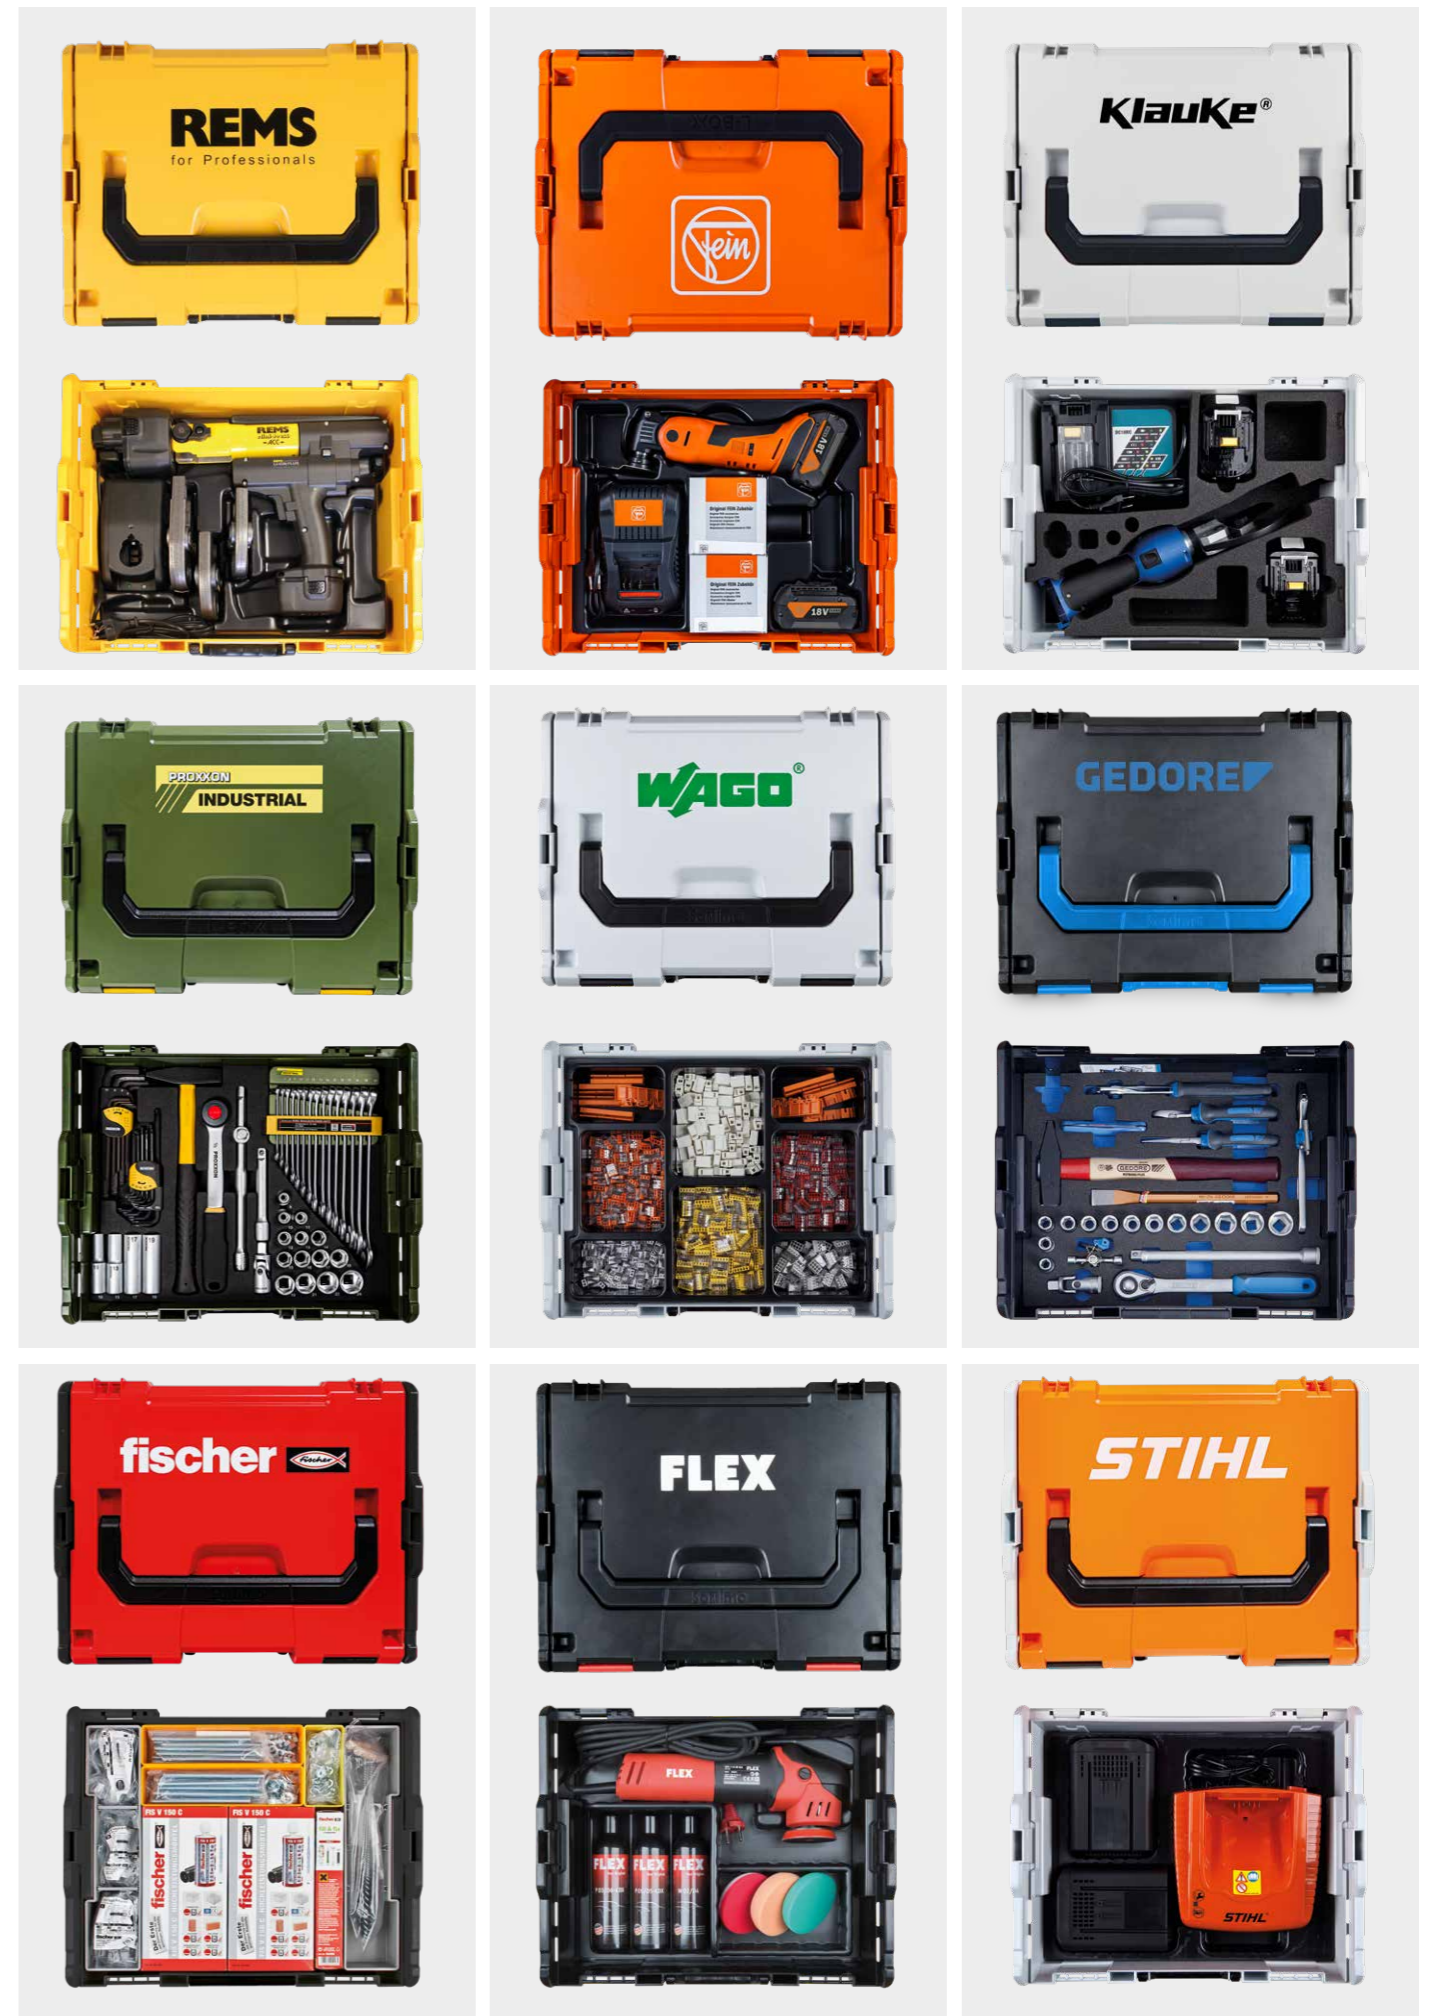

The L-BOXX is much more than just a carrying case – with its huge number of combinations and expansion options, it becomes an intelligent transportation and storage system.

That's why a host of well-known manufacturers use the L-BOXX System as intelligent outer packaging for their products, providing their customers with real value added.

The BOXXes work together perfectly like a well-coordinated team. No matter what the colour or manufacturer, all L-BOXXes are compatible with each other.

Instead of a confusing collection of different carrying cases and storage containers, professionals can create a uniform and fully compatible system – for easy handling and maximum mobility.

L-BOXX®

For quick and efficient mobile working
THE L-BOXX SYSTEM

THE PROBLEM

THE SOLUTION

The craftsman works with a huge range of different machine cases, boxes, cartons and buckets. This means it can be difficult to monitor stock levels of expendable materials; transport is hard work; and every day lots of valuable time is lost during loading and unloading, as well as securing cargo.

L-BOXX and ProClick are the solution: Two mobility systems that are compatible with each other and guarantee a fast and efficient way of working.

ProClick

THE ProClick SYSTEM

- **The innovative click system**
Allows intuitive connecting, combining and separating in seconds, as well as clever transporting and time-saving carrying when used in combination.
- **Simply flexible**
Thanks to the wide range of well thought-out accessories and the modular design, the two mobility systems can be expanded as desired, individually and without limitation.

- **A clear overview**
Tidiness and clarity, even in the workshop – so you won't forget anything that you'll need later on the construction site.
- **Everything at hand**
Thanks to the integration into the vehicle equipment systems of numerous well-known manufacturers, the BOXXes and the ProClick system are quickly, safely and neatly stowed in the vehicle.

Mobility systems

- The robust click mechanism and carrying handles permit L-BOXXes to be transported in bundles of up to 40 kg
- The lid can be loaded with up to 100 kg
- Each L-BOXX has a loading capacity of up to 25 kg
- Splash-proof
- Ergonomically shaped handles and additional side grips for flexible and convenient handling
- BOXXes are clicked together and separated with unbeatable ease

Thanks to its rugged design made from impact and shock-resistant ABS plastic, the L-BOXX® can handle nearly every challenge and withstand even extreme loads. Making it ideally equipped for daily use on the construction site. Whether you need to transport heavy material, small parts, machines or tools, the L-BOXX® brings everything to the place of use easily and conveniently.

The L-BOXX® brand stands for more than just a toolbox available in four different sizes. It is the basis of a product family with a system concept.

We also follow this concept when designing the standardised accessories that let you individually adapt the BOXXes to suit your own needs.

Robust . Mobile . Efficient Mobility solutions for all areas

Quick connection and disconnection of the BOXXes thanks to simple click mechanism

Convenient transport in combination thanks to the patented click connection

ProClick changes how professionals carry their tools – always everything at hand

Power-saving and efficient transport to and from the construction site

Fully compatible with numerous manufacturers of vehicle equipment
